

Diego Miura

New Haven, CT | (813) 614-6263 | miuradiego05@gmail.com | [LinkedIn](#) | [GitHub](#) | [ORCID](#) | [Personal Website](#)

EDUCATION

Yale University, New Haven, CT

Expected Graduation May 2027

- BS in Astrophysics, GPA: 3.6, Certificates in Data Science and Energy Studies
- *Relevant Coursework*: Physics of AI, Mathematical Methods of Physics, Probability Theory
- *Awards*: Hispanic Scholarship Fund Scholar

SKILLS

- *Languages*: English & Spanish (Native), French (Working), Dutch & Portuguese (Basic)
- *Technical*: Excel, PowerPoint, Python, SQL, Git, Shell; NumPy, PyTorch, JAX, FFmpeg
- *Analytics*: Statistics/Probability, Optimization, Modeling, Data Visualization

LEADERSHIP

Elmseed Consulting, *Head of Consulting*, New Haven, CT

2023-Present

- Oversee 3 concurrent client engagements, managing teams from problem structuring through final delivery, maintaining 100% on-time delivery across all active projects.
- Standardize templates and review processes for slide decks and workplans, reducing turnaround time across projects by 10 days compared to last year.
- Co-developed Elmseed's consultant onboarding program, designing workshops on structured problem-solving and slide writing that have trained 20+ analysts across 2 semesters.
- Launched and currently run Elmseed's High School Consulting Fellowship, recruiting 30 students (including 15 international participants) from 12 schools through weekly case sessions and a capstone competition.

Yale Astronomical and Space Student Society, *Founder & Project Chair*, New Haven, CT

2023-Present

- Drive outreach to first-years and the New Haven community, expanding organization reach from 50 to 500+ students.
- Deliver 40+ astronomy events with 20+ attendees per event over 2 years, including faculty-student dinners and meteor-shower & northern-lights observing nights.
- Launched and manage an underclassmen-upperclassmen astronomy mentorship program, doubling participation from 5 to 10 mentees and maintaining 100% year-over-year retention.

INDUSTRY EXPERIENCE

Deep Media, ML Research Intern

June 2026 – August 2026

Ryan Ofman

- Advancing deepfake detection capabilities through dataset engineering, model benchmarking, and failure analysis of diffusion model and GAN-generated synthetic media.

PUBLICATIONS & RESEARCH EXPERIENCE

DiRAC Institute, Seattle, WA

2025-Present

Aritra Ghosh Group

- Lead researcher applying Hyrax (open-source astronomy ML framework) to identify galaxy mergers in HSC-realistic IllustrisTNG simulations, training and benchmarking CNN and self-supervised models on 15,000+ images. Ongoing peer-review for co-authored Hyrax paper.
- Execute large-scale training on the NCSA Delta supercomputer, monitoring convergence and run stability to identify strong configurations for further hyperparameter tuning.

Yale University, New Haven, CT

2023-Present

Meg Urry Group

- Co-authored a peer-reviewed Astrophysical Journal study characterizing 706 variability-selected AGN at $z < 1.5$, finding their black holes are systematically overmassive relative to local AGN scaling relations.
